Account Codes - Codes that users can assign in association with whatever they want to track their long distance usage against, such as a project, a department, a division or a customer. Account codes provide users with the ability to track usage for all long distance calls and provide security for all locations. Verified account codes are always validated in the network before the call is allowed to complete. Unverified account codes are not validated in the network before the call is allowed to complete.

3.1.1(d) Class of Service (Cont'd)

<u>Prepaid Calling Card Services</u> - Prepaid calling cards provide customers with the ability to prepay for long distance calling cards, which are utilized to place calls to both domestic and international locations.

Prepaid Calling Card Services are billed in sixty (60) second initial increments and sixty (60) second additional billing increments.

The prepaid calling cards are measured in minutes or units depending on the type of card purchased. Balances will be reduced and depleted based upon usage.

A verbal warning is provided to the caller when the amount of units remaining on the card reaches a certain level. A call will be disconnected upon depletion by Customer of all available units on the card. The acquisition of a card will entitle the Customer to make calls from the time of purchase until the card balance is either depleted or until the card expires, whichever, occurs first.

Calls must originate in a U.S. Territory and do not support International origination. Cards cannot be used to place 700, 900, or 976 number calls. Prepaid calling cards cannot be used to place certain toll-free, operator-assisted, third party billed, or collect calls.

Prepaid calling cards expire ninety (90) days from the date of activation. Once a card expires or is depleted, the card no longer holds any value. Prepaid calling cards are non-returnable, non-refundable, and non-rechargeable.
